

If you agree to participate you will be involved in a study of *(Prevalence of partial edentulism among young Saudi women of Qassim and their perception of early tooth)*. We are conducting this clinical study as part of the course requirements for DENT425. Amal Al-mutary, dental student at Qassim University is conducting this study. Dr. Minu, Assistant professor on prosthodontics, is supervising this study.

Risks and benefits of being in the study There are no known harms associated with participating in this research.

Confidentiality The information you provide will be kept confidential. Information that could identify you will be kept separate from any other information that you might provide. The records of this study will be kept private. Research records will be stored securely and only researchers will have access to the records. When we share the results of this research, we will not include any information that will make it possible to identify individual participants.

Voluntary nature of the study You are free to choose if you want to participate in this study or not. Participating in this study is voluntary. There is no cost or penalty if you choose not to participate. If you decide to participate, you are free to not answer any question or to withdraw at any time. We would, of course, appreciate it if you will help us by completing the entire (questionnaire, clinical examination).

Name:

Age:

occupation: a-employed

b-unemployed

Education : a-No formal schooling
university/post graduate degree

b-Primary Secondary -College/

Health status/ problems : a-Healthy/ No health problems b- Diabetics

c- High blood pressure

Dental visits

a-routine visits and check ups b-when there is any dental problems c-
Never

Dental hygiene

a-Tooth brushing b-No c- Once d-More than 2× / day

Do you have any missing teeth?

a-yes b-no

Reason for loss of teeth:

a- caries b-periodontal c- other

Duration of loss of teeth without treatment:

a-less than 3 months b-3 month to 6 month

c-more than 6 month d- other

Reason of unreplaced missing teeth after extraction:

a- lack of awareness b-Aware but for economic reason c-fear d- felt no
difference after extraction

Who advised you to replace the lost tooth:

a-self motivated b-friends\relatives c-consultation from dentist

d-Attending medical practitioner

Clinical Examination

Teeth Missing:

Restored teeth status:

Prosthetic Status:

a-No prosthesis

b-Bridge

c-More than 1 bridge

d-Partial denture

e-Both bridge(s) and partial denture(s)

Area of prosthesis:(if patient has prosthesis)

Removable partial denture	Fixed partial
Maxillary anterior	Maxillary anterior
Maxillary posterior	Maxillary posterior
Mandible anterior	Mandible anterior
Mandible posterior	Mandible posterior

Prosthetic Need:

a-No prosthesis needed.

b-Need for one-unit prosthesis.

c-Need for multi-unit prosthesis.

d-Need for combination of one or multi-unit prosthesis

e-Need for full prosthesis (replacement of all teeth)
